Professional Summary

Software Development & DevOps Engineer with hands-on experience in **Python, Java, Data Structures & Algorithms, Cloud Platforms (AWS, Azure), and CI/CD automation**. Skilled in **containerization (Docker, Kubernetes), Infrastructure as Code (Terraform, ARM Templates), and predictive analytics (LSTM, Machine Learning models)**. Proven ability to design, automate, and deploy scalable applications while ensuring performance, reliability, and security across multi-cloud environments.

Skills

Languages: Python, Java, C (basics), JavaScript, SQL
Frameworks & Tools: Git, GitHub, Jupyter Notebook, VS Code
Databases: MySQL, NoSQL
Cloud & DevOps: AWS (EC2, ECS, S3, ECR), Microsoft Azure, Docker, Terraform, ARM Templates, GitLab CI/CD, Azure DevOps
Concepts: Data Structures & Algorithms, Object-Oriented Programming, Agile Development, Machine Learning(predictive modeling)

Work Experience

Cloud/DevOps Intern *Emergys Solutions Pvt Ltd — Jan 2025 to Current*

- Engineered and **automated end-to-end CI/CD** pipelines in **Azure DevOps (YAML)** and GitLab CI/CD, **reducing deployment time by 40%**.
- Provisioned and managed cloud infrastructure** on Azure using **ARM Templates** and experimented **Terraform** (IaC) for cross-cloud automation.
- Deployed and scaled a full-stack Node.js application** on **Azure App Services** using Infrastructure as Code (ARM Templates).
- Worked on **AWS services (EC2, ECS, ECR, S3)** for containerized workloads and storage integration, gaining multi-cloud exposure.
- Collaborated in an **Agile DevOps team** to troubleshoot CI/CD issues and optimize deployment workflows.

Projects

Drakestone Deployment (Cloud-Native Application): Emergys

- Implemented Streamlit frontend + FastAPI backend containerized with Docker.
- Pushed images to Amazon ECR, deployed on Amazon ECS (EC2 GPU), and automated deployments via AWS CodeCatalyst pipelines.

Account Management Framework (Full-Stack Application): Emergys

- Built and deployed a Node.js backend and React.js frontend on Azure App Services.
- Implemented CI/CD pipelines in Azure DevOps (YAML) for automated build & deployment.
- Integrated Azure Repos with pipelines to ensure smooth version control and repeatable releases.

Stock Market Price Prediction (ML Project): Master’s

- Developed a predictive model using Python, Jupyter Notebook, and LSTM trained on historical data from Yahoo Finance.
- Built an interactive Streamlit application supporting 3000+ Indian stocks, providing reliable forecasts, insights, and analytics.

Education

Master of Computer Science Ferguson College	Pune (08/2023 – 05/2025)
Bachelor of Computer Science Ferguson College	Pune (08/2020 – 06/2023)

Certification

- Python Advance
- Gitlab CI Fundamental - (Gitlab Associate)
- Oracle Cloud Infrastructure – Foundation Associate
