Profile

Data Engineer enthusiastic about transforming raw data into scalable pipelines and analytics-ready systems. Skilled in **SQL, PySpark, Data Modeling** with hands-on experience in **Azure, Databricks, ADLS, ADF, MS Fabric, Snowflake** and exposure to **Machine Learning and Generative AI** concepts.

Education

Master's in Computer Science Fergusson College Pune	2023 - 2025 CGPA : 8.48
Bachelors Of Computer Science New Arts, Commerce and Science College A.Nagar	2020 - 2023 CGPA : 8.34

Skills

- **Programming & Scripting:** Python, Java, C
- **Big Data & Cloud:** Apache Spark, PySpark, Snowflake, Azure Databricks, Ms Fabric
- **Databases and Query Languages :** MySQL, PL/SQL, SQL
- **ETL & Data Handling:** Data Pipelines, Data Warehousing, Auditing Framework
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code
- **Web Technologies (basic exposure):** HTML, CSS, React.js
- **Data Structure and Algorithms**

Professional Experience

Data Engineering , Emergys Solutions Pvt Ltd	Jan 2025 - Present
• Built data pipelines integrating Azure Data Lake Storage (ADLS), Azure Data Factory (ADF), and Databricks and MS Fabric. • Good understanding of Apache Spark architecture (RDDs, DAGs, lazy evaluation) to improve data processing efficiency. • Worked with MS Fabric, Data Warehousing, and Data Lake concepts for scalable data storage and analytics. • Developed PL/SQL procedures, triggers, and business logic to support backend data workflows. • Delivered end-to-end Microsoft Fabric solutions, including data modeling, ETL processes, and reporting.	

Projects (Emergys Solutions Pvt Ltd)

BAMSI

- Built end-to-end data pipelines using Microsoft Fabric, ingesting data from **SharePoint** into Lakehouse and transforming it using **Medallion Architecture** (Bronze, Silver, Gold).
 - Implemented auditing framework using Python scripts and stored procedures for pipeline monitoring, data quality, and traceability.
 - Designed data models and optimized ETL workflows to deliver reliable, analytics-ready datasets for reporting.
 - Enforced robust data governance and security by managing Workspace RBAC and configuring item-level security policies.
 - Workspace to workspace migration through CI/CD.
- ETL Tool: **MS Data Fabric**(PySpark, SQL, Data Pipelines, BI Reports)

ETL Accelerator

- Developed a dynamic ETL framework in PySpark to automate data ingestion, transformation, and loading from multiple sources.
 - Applied business rules, schema validation, and data quality checks to ensure reliable pipelines.
- Technology Stack: Python, PySpark, Azure Blob Storage, SQL Server

Insurance Data Analysis – Excel, SQL, Data Modeling

- Transformed raw insurance data into structured database SQL reporting and analysis.

Healthcare Management System – MySQL, Data Modeling

- Designed data model for healthcare , ensuring data integrity & optimized performance.

Achievements

Data Engineering(Udmey)	Snowflake -6 Badges
SnowPro Associate: Platform Certification (Snowflake)	CodeChef 100 Days Badge
Microsoft Certified: Fabric Data Engineer Associate (DP-700)
